Art. no. 360-596
Light from an invisible source.
Q FOUR TT range of luminaires.

Minimalistic luminaire bodies made of black or white aluminium with especially
developed Bartenbach lenses focus
LED light on a defined surface. A precise
spot with brilliant, glare-free light creates
different zones while accentuating rooms
and their contents. The Q Four range
of luminaires provides architects and
lighting designers with a complete
toolbox for the use of directed light.

Q FOUR TT
Precise turning and tilting.
The elegant tilt arm allows you to
move the Q Four TT to your preferred
position – perfect for accentuated wall
washing with a defined lighting effect.
